Special Purpose Reports

**Borescope
Inspection**

Drill a hole in the wall the size of your finger (approx 12mm), & insert the Borescope Camera. Allows us to see in the wall cavity but not probe the timbers.

\$120
Verbal / No Report

Snap In Vent

Cut a hole in the wall to the area required that is a size of a common house brick and cover hole with a snap in vent. This allows us access to the timbers to test the structural soundness in the immediate areas of the vent installation.

\$220
With Report

Roof Cladding

Remove roof cladding to suspect areas. This can allow inspection of roof members, soffits and wall cavities (limited).

\$220
With Report

**Removal of
Wall Sheets**

Removal of wall sheeting is recommended. The removal of wall sheeting will allow us full access to the wall and be able to see the full extent of damage, and advise the probable costs to rectify

\$660-\$880
